Goals of the Instructional Program

Annual Goals of the Board and Administration

In order to better fulfill its accountability to the public and to provide leadership to the administration and the system, the Board will present on an annual basis a list of its goals for the coming school year. These will normally be finalized before the start of each school year. They will generally be comprised of action or procedural statements to achieve the goals of the District.

Procedure

Prior to the beginning of each school year, the Chairperson will solicit ideas for goals for the coming year. At the end of each year the Board will review its progress in achieving the stated goals.
