

Mission - Goals - Objectives

Goals/Objectives for School Operations

The Board of Education recognizes that an annual assessment is necessary to assure that the school system continues to improve its delivery of education and avoids the mediocrity bred from complacency. Therefore, the Board assures that the administration will develop an annual plan that expresses the goals and objectives for school operations. These goals and objectives shall be made part of these policies and shall provide the overall direction for school operations in each school year.

Policy adopted: January 13, 2003
